SUMMARY

Frontend-focused Software Engineer with experience building scalable, performant web and mobile applications using React.js, React Native, TypeScript, and Node.js. Currently at Fyn Mobility, shipping features on Infynity, including SDK integrations, install attribution tracking, and push notification systems, for blue-collar and gig workers. Previously delivered 10+ customer-facing features at Red Tree India, with measurable gains in rendering performance and API efficiency. Active open-source contributor to react-big-schedule with multiple merged PRs. Strong focus on clean architecture, accessibility, and maintainable code.

EXPERIENCE

Associate Software Engineer

Fyn Mobility

Bengaluru, India

May 2026 – Present

- Integrated the JAR DigiGold SDK, enabling in-app digital gold investment flows for blue-collar and gig workers on the Infynity platform.
- Implemented UTM-based source/campaign tracking for Play Store installs via the Google Play Install Referrer API, enabling precise attribution across marketing channels.
- Integrated Push Notifications via Firebase Cloud Messaging with deep-link routing, directing users to contextually relevant in-app screens.
- Resolved production bugs across date validation, internationalization, and input handling on iOS and Android; refactored shared state using custom wrappers and lifting-state-up patterns to improve maintainability.

Software Engineer Intern (Frontend)

Red Tree India

Remote

Aug 2025 – Mar 2026

- Built and maintained a React.js and TypeScript frontend from design handoff to production; delivered 10+ customer-facing features end-to-end in an Agile workflow.
- Improved rendering performance by ~35% using `useMemo`, `useCallback`, lazy loading, and code splitting; eliminated stale closure bugs across key UI views.
- Integrated 5+ REST APIs with JWT auth and structured error handling; collaborated with backend engineers to reduce average payload size by ~20% through query optimization.

Web Design Virtual Intern

AICTE-Eduskills

Remote

Jan – Apr 2025

- Delivered 8+ responsive, accessible web layouts using HTML5, CSS3, and Tailwind CSS; translated Figma prototypes into pixel-accurate UI components through iterative design reviews.
- Applied semantic HTML and ARIA attributes for accessibility compliance; optimised assets and critical render path, improving page load performance by ~25%.

OPEN SOURCE CONTRIBUTIONS

react-big-schedule

- Reduced re-renders by ~40% using `useMemo`, `PureComponent`, and `React.memo`; fixed stale closure bugs with refs, improving FPS in a real-time scheduling UI. [PR #327](#)
- Implemented merged multi-resource event creation via vertical drag-selection; introduced `resourceIds` API with full backward compatibility and improved row/cell highlight feedback. [PR #336](#)
- Fixed a UTC offset bug causing date-only events to render one day short in Month view; built `normalizeEventStart` and `normalizeEventEnd` utilities anchoring date strings to local day boundaries. [PR #356](#)

jeffrescignano-io – Semantic CSS Refactor

- Audited and renamed 50+ Webflow-generated utility classes to semantic equivalents site-wide with zero visual regressions, improving long-term maintainability of a production codebase. [PR #131](#)

PERSONAL PROJECTS

TaskFlow – Full Stack Task Manager

- Full-stack task manager with real-time UI updates, CRUD operations, and Docker containerization for reproducible deployment. RESTful Node.js/Express API backed by MongoDB; state managed via React Context + `useReducer`.
- Stack: React.js, TypeScript, Node.js, Express.js, MongoDB, SQLite, Docker. taskflow-plum-one.vercel.app

TECHNICAL SKILLS

Web Core: HTML5, CSS3, JavaScript (ES6+), jQuery, Responsive Design, Cross-Browser Compatibility, WCAG Accessibility, Semantic HTML, ARIA

Frameworks / Styling: React.js, React Native, Next.js, TypeScript, Node.js, Express.js, Flask, Tailwind CSS, SASS, CSS Modules

CMS / Tools: Webflow (CMS), Figma-to-code handoff, component-based content architecture, ESLint

Cloud / DevOps: Microsoft Azure, Docker, GitHub Actions (CI/CD), Vercel, Git, GitHub

Databases & APIs: MongoDB, MySQL, Firebase Firestore, Supabase, REST APIs, JWT Authentication, WebSockets

Languages: JavaScript, TypeScript, Python, HTML5, CSS3, SQL, C/C++

EDUCATION

Bachelor of Computer Applications

University Institute of Computing, Chandigarh University

CGPA: 7

Diploma in Computer Applications

Perfect Computer Institute, Chandigarh

78.5%
