Summary

Frontend-focused Software Engineer building scalable, performant web and mobile applications with React.js, Next.js, React Native, TypeScript, and Node.js. Currently at Fyn Mobility, shipping Infynity's Next.js website and blog alongside Meta and JAR SDK integrations, install attribution, and push notifications. Open-source contributor to react-big-schedule and maintainer of TaskFlow.

Experience

Associate Software Engineer *May 2026 – Present*

Fyn Mobility Bengaluru, India

- **Built and shipped Infynity's multi-page website in Next.js,** including a blog with dynamic routing, reusable page layouts, and SEO-optimised metadata.
- **Integrated the JAR DigiGold SDK,** enabling in-app digital gold investment flows for blue-collar and gig workers.
- **Integrated the Meta SDK** for app-event tracking and campaign install attribution, with UTM attribution via the Google Play Install Referrer API; shipped Firebase Cloud Messaging push notifications deep-linking to the relevant in-app screen.
- **Resolved production bugs** across date validation, internationalization, and input handling on iOS and Android; refactored shared state with custom wrappers and lifting-state-up patterns.

Software Engineer Intern (Frontend) *Aug 2025 – Mar 2026*

Red Tree India Remote

- **Built and maintained a React.js and TypeScript frontend** from design handoff to production; delivered 10+ customer-facing features end-to-end in an Agile workflow.
- **Cut render cost** with useMemo, useCallback, lazy loading, and code splitting; removed stale closure bugs in key UI views.
- **Integrated 5+ REST APIs** with JWT auth and structured error handling; worked with backend engineers to trim response payloads through query optimization.

Web Design Virtual Intern *Jan – Apr 2025*

AICTE-Eduskills Remote

- **Delivered 8+ responsive, accessible web layouts** using HTML5, CSS3, and Tailwind CSS; translated Figma prototypes into pixel-accurate UI components.
- **Applied semantic HTML and ARIA** for accessibility compliance; optimised assets and render path for faster page loads.

Open Source Contributions

react-big-schedule

- **Cut redundant re-renders** using useMemo, PureComponent, and React.memo; fixed stale closure bugs with refs, improving frame rate in a real-time scheduling UI. PR #327
- **Implemented merged multi-resource event creation** via vertical drag-selection; introduced a backward-compatible resourceIds API with improved row/cell highlight feedback. PR #336
- **Fixed a UTC offset bug** rendering date-only events one day short in Month view; built normalizeEventStart / normalizeEventEnd utilities anchoring date strings to local day boundaries. PR #356
- **Fixed event layout across Day, Week, and Month views:** multi-day bars now span only the visible cells they cover and events render at exact times in hour cells, correct across DST and month boundaries. PR #414, #415

jeffrescignano-io – Semantic CSS Refactor

- **Audited and renamed 50+ Webflow-generated utility classes** to semantic equivalents site-wide with zero visual regressions, improving maintainability of a production codebase. PR #131

Personal Projects

TaskFlow – Open-Source Full Stack Task Manager

React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, Tailwind CSS, Vite GitHub | Live Demo

- **Open-sourced a beginner-friendly MERN app** (MIT) for first-time contributors: JWT auth, per-user task isolation, and a filterable REST API; migrated CRA to Vite, deployed on Vercel and Render; added good-first-issue labels.

Technical Skills

- **Web Core:** HTML5, CSS3, JavaScript (ES6+), jQuery, Responsive Design, Cross-Browser Compatibility, WCAG Accessibility, Semantic HTML, ARIA
- **Frameworks / Styling:** React.js, React Native, Next.js, TypeScript, Node.js, Express.js, Flask, Tailwind CSS, SASS, CSS Modules
- **CMS / Tools:** Webflow (CMS), Figma-to-code handoff, component-based content architecture, ESLint
- **Cloud / DevOps:** Microsoft Azure, Docker, GitHub Actions (CI/CD), Vercel, Git, GitHub
- **Databases & APIs:** MongoDB, MySQL, Firebase Firestore, Supabase, REST APIs, JWT Authentication, WebSockets
- **Languages:** JavaScript, TypeScript, Python, HTML5, CSS3, SQL, C/C++

Education

Bachelor of Computer Applications, Chandigarh University *May, 2026*

Diploma in Computer Applications, PCI-Chandigarh *Feb, 2023*
